## sensor™ designed to lead

**SENIOR™ is more than a tool for localisation, follow-up and reporting.**

**SENIOR is the most versatile tool for comprehensive development and guidance of your driving work.**

- driving behaviour evaluation and guidance
- vehicle tracking on maps and trip monitoring
- reports, logging, summaries
- various additional features tailored to the needs of different transport sectors and customers

### Many miles of experience...

SENIOR has been developed to improve traffic safety, environmental sustainability and economic efficiency. With the SENIOR system, we have analysed and given feedback on 5 million hours driven by professionals. Based on this information, our users have been able to save millions of Euros, have reduced accidents and thousands of tons of harmful emissions. We know best what leads to traffic performance differences. We know and tell the reasons and their consequences.

### ...and always one mile ahead

The SENIOR system is a constantly evolving, dynamic package and flexibly adapts to your company's changing needs. The fully renewed SENIOR is even more flexible and user-friendly. It suits any sector, different vehicles and customers.

**5,000,000 driving hours experience in analysis and guidance.**

**Thousands of tons less emissions.**

**Millions of Euros of savings.**

## Quality and competence pays off!

**Sensor is a profitable investment. Guidance and development of your driving work creates savings accruing from many different sources:**

- Fuel consumption
- Maintenance and repair
- Damages and dents
- Well-being at work
- Work safety
- Tires, suspension, brakes
- Route planning
- Fleet use optimisation
- Insurance
- Quality and company image
